-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10 November 2003 has been entered.

### ***Election/Restrictions***

2. Applicant's election without traverse of group II in Paper No. 5 is acknowledged.
3. Claims 1-31, 37-65 and 71-75 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 32, 35, 66, 67, 69 and 70 are finally rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wark et al, 5,809,987. Note figures 3 and 5. The examiner is interpreting "semiconductor device" to include the tape 18. Alternatively, the

examiner considers that the vacuum, while acting on the tape, must also act on the wafer as the wafer is in contact with the tape, before, during and after dicing.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 34, 36, 68 and 70 are rejected under 35 U.S.C. 103(a) as being obvious over Wark et al '987 in view of Ishiwata et al, '023. '987 do not disclose the method of sawing the devices from the substrate at substantially the same time. '023, in a similar method, teaches sawing the devices from the substrate at substantially the same time. It would have been obvious to one of ordinary skill to have provided '987 with the method step of sawing the devices at substantially the same time, as taught by '023, to perform dicing at an increased efficiency. See the abstract.

***Response to Arguments***

8. Applicant's arguments filed 10 November 2003 have been fully considered but they are not persuasive. Please refer to the rejection above. It is the examiner's position that the vacuum chuck disclosed by '987 does provide a vacuum force to a portion of at least one of the devices as set forth above.
